

I am a resident of Indiana and have been very pleased with the no marketing calls via the Indiana Privacy Act. Everyone in my neighborhood associated signed up for this as a group and are encouraging our federal officials to not take this privacy away from us by diluting it at the federal level. We are asking our Senators to do something at the federal level but NOT the proposal of allowing us to be interrupted as 'past customers'. Prior to the law it became a nightmare at our house due to phone interruptions from sales. Please do not do anything to that dilutes the current Indiana Law.
